

In the specification:

Page 1, amend the paragraph in lines 6 and 7 as follows:

The invention is based on a magnet mount and a method for securing a magnet to a carrier element ~~according to the general class of Claim 1 and Claims 12, 13.~~

Page 1, amend the paragraph in lines 16-19 as follows:

In contrast, the magnet mount according to the invention and the method according to the invention for securing a magnet to a carrier element ~~having the characteristics and features of Claim 1 and Claims 12, 13~~ have the advantage that magnets can be secured to a carrier element in simple fashion.

Delete lines 21 and 22 of page 1.

Page 5, amend the paragraph in lines 1-4 as follows:

The carrier element 5 can also be a laminated core formed out

of individual sheet-metal laminates 31. During manufacture of a sheet-metal laminate 31 using a stamping tool, sheet-metal laminates are produced without projection 27 and with projection 27.

Page 5, line 6, amend as follows:

The different sheet-metal laminates 31 are stacked and bundled accordingly.
